SF&LF_Flash_Wizard_User_Manual.pdf

WHAT IS MATHLIB.PRC:

MathLib.prc is included in the prc file that you will install and is a free shared library that can be used by any Palm OS 2.0+ program that requires IEEE 754 double precision math functions. It's distributed under the terms of the GNU Library General Public License, and is freely available with full source code and documentation at the MathLib Information web page. MathLib.prc is not a part of Sun/Fill Flash Wizard nor was it written by me. You have not purchased MathLib.prc with your purchase of Sun/Fill Flash Wizard. A free copy has been included in this package so that you won't have to look for it on the internet and download it.

INSTALLING SUN/FILL & LIGHT FALL-OFF FLASH WIZARD®:

Tap the Hot Sync icon in the applications screen (home screen) of your Palm hand-held and you will see "HotSync" displayed in the upper left corner and the "User Name" displayed in the upper right corner of the screen. Start up "Palm.exe" and "Palm Quick Install.exe" on your Desk Top PC. Select the User Name on the upper right corner of both applications that matches the HotSync name on the Palm hand-held. Connect the hand-held to the PC using a Sync Cord. Drag "NutShell_for_SFLFOFW.prc" into your PDA QuickInstall utility. Tap the HotSync button (just to the right of the writing area on

your Palm PDA) to install Sun/Fill & Light Fall-off Flash Wizard[®] and its required libraries. Just follow the instructions on the screens. If, after that action is complete, there is a Flash Wizard icon on the menu that says “Install”, tap it to complete the installation. After installation is complete, you will see this icon:

USING SUN/FILL & LIGHT FALL-OFF FLASH WIZARD[®]:
